Wanted: Vacant lots

help us turn ...

Seeds of Success was created in the spring of 2010 through a partnership between Community Action Duluth, the A.H. Zeppa Foundation, and the City of Duluth. Seeds of Success provides green job opportunities to low-income workers by transforming vacant urban areas into a source of farm-fresh vegetables. Grown using sustainable farming methods, our tomatoes, cucumbers, lettuce, peppers, carrots, and more flourish at sites all over the city.

At Seeds of Success, we transform vacant urban areas into a source of farm-fresh, healthy food. Grown using sustainable farming methods, our tomatoes, cucumbers, lettuce, peppers, carrots and more flourish at sites all over the city, from Chester Bowl to Lincoln Park. By eliminating chemical pesticides, herbicides and fertilizers, we are demonstrating our commitment to the long-term health of the land and the community.

... your vacant lot ...

In order to grow our program and create more jobs, we are seeking more land to cultivate. If you have unused land, please consider donating it to our program. If you have plans to develop your property in the future, we are also happy to work out short-term leases instead of a donation. As stewards of your land, we will improve the soil quality by building up nutrients and organic matter through non-chemical means.

If you are interested in donation or leasing some of your land to us, please contact Community Action Duluth's Seeds of Success Program Manager at seeds@communityactionduluth.org or call 218.726.1665 x45.
